ACKNOWLEDGEMENT

We wish to express our sincere gratitude to our honourable Chairman **Thiru. R. SRINIVASAN, B.B.M.,** for providing immense facilities at our institution.

We would like to express our sincere gratitude to our Vice Chairman, **Thiru. K. S. SACHIN, MBA (UK).,** for providing a supportive environment for the completion of our project work.

We are truly grateful to express our gratitude to our beloved Principal **Dr. R. GOPALAKRISHNAN, M.E., Ph.D.,** for the encouragement given towards the progress and completion of our project.

We proudly render our immense gratitude to the Head of the Department **Dr.R.POONKUZHALI, M.E.,Ph.D** for her effective leadership, encouragement and guidance in the project.

We are highly indebted to provide our heartfelt thanks to our supervisor **Mr.M.THILAKRAJ, B.E, M,E.,** for his valuable ideas, encouragement and supportive guidance throughout the project.

We wish to extend our sincere thanks to all faculty members of **INFORMATION TECHNOLOGY** for their valuable suggestions, kind co-operation and constant encouragement for successful completion of this project.

ABSTRACT

The Hostel Maintenance Request Tracker is a web-based application developed to simplify and improve hostel maintenance management processes. In many hostels, students face difficulties in reporting issues such as electrical faults, plumbing problems, internet connectivity issues, damaged furniture, and cleaning-related complaints due to traditional manual complaint systems. This project provides a digital solution that allows students to submit maintenance requests online and track their complaint status in real time.

The system is designed with different modules for students, administrators, and maintenance staff to ensure effective communication and efficient complaint handling. Students can register complaints through a user-friendly interface, while administrators can monitor all maintenance activities, assign tasks, and manage complaint priorities. Maintenance staff can update the repair status and mark complaints as completed after resolving the issues.

The application is developed using HTML, CSS, JavaScript, Java, and MySQL to provide a responsive interface and secure database management. The system reduces paperwork, improves transparency, increases accountability, and ensures faster maintenance services within the hostel environment. Overall, the Hostel Maintenance Request Tracker enhances hostel administration by providing a smart, reliable, and efficient maintenance management solution for students and hostel authorities.
